## Charivari Held For Mr. and Mrs. H. Ruste

Over 30 friends arrived at Mr. and Mrs. Henry Ruste's place last Tuesday night in a root'n'oot'n fashion completely surprising the newtyneds. The Gulleksens arrived early just to make certain that the Rustes would be home. The remaining group met at a corner up the road and as they drove into the yard with the headlights on, the power was switched off at the yard pole. The house and the Rustes were in the dark, there being no harm in retaliation. After the tooting of horns and the ringing of bells and old tiller blades ceased, the lights came back on and the guests were welcomed in.

Congratulations were extended to the bride and groom, and a social evening followed. The feature contest took place between the groom and Ed Gullekson. Blindfolded ladies fed cream pie to the two men and the groom won by a bite. Incidentally they got most of the pie inside.

After lunch Henry and Arlene were presented with a beautiful chenille bedspread. Jack Perkins made the presentation and welcomed Arlene to Wainwright. The groom responded in some very well chosen words thanking their guests.

## Gas Kings Honored Guests at Banquet Held Saturday, April 17

(From The Viking News)

The hockey season was officially wound up locally last Saturday evening when a banquet was tendered the Viking Gas Kings, champions of the Eastern Alberta hockey league. The banquet was held in the waiting room of the curling rink and the catering was done by Mrs. Bruha and staff from Rudy's Cafe and the ladies. The menu of luscious steaks and all the trimmings was partaken by all present with great gusto and to say the least it was heartily enjoyed by all present.

Acting as toastmaster was Selmer Halso, president of the hockey club, who congratulated the club on their good showing during the semi and final playoffs for the Craig cup which, incidentally, adorned the banquet table.

Vice-president H. G. Thunell proposed a toast to the Gas Kings and joined in extending congratulations to the members of the club. Manager Rasmussen, assistant manager Leo Kelly, trainer Ralph Brown, stick boy Don Briggs and last but not least, coach Lorne Lewis. He mentioned the faithful fans from town and country who filled the arena for every game and also accompanied the team for away games. He stated that the team had been a good public relations body between town and country and had produced a pleasing brand of hockey both at home and away.

Others who helped to make the hockey season a success were the ladies who operated the snack bar, Mr. Belman the caretaker and his gang of ice cleaners, the Carena Board, Ken Hilliker and Norm Rasmussen, scorekeepers and timekeepers, Dave Henderson, Mrs. Briggs, Johnny McQuillan and other members of the finance committee.

tee, Bob Thunell and Bill Stalker up in the press gondola, ushers and coffee and hot dog salesmen during periods, all had made a contribution towards the smooth operation of the Carena.

Mr. Albert Glasgow replied on behalf of himself and the team. He felt that the team had worked well together and had enjoyed playing the kind of game that pleased the fans. Mr. Glasgow had been with the team for the past three years, together with Billy Masson and Red Frickleton from Irma who were always counted upon to keep the game on a high plane. He felt that the Carena had contributed much toward the success of hockey in this community and extended best wishes in the future.

Mr. Ken Hilliker, representative for Viking on the league executive also extended congratulations to the team in winning the Craig Cup and told of some of the work of the directors of the Eastern Alberta hockey league. He made some observations as to how the league functioned and stated some rulings were not altogether in favor of Viking but these would be ironed out at a meeting of the representatives before fall. While the team played good hockey most of the time, some had not been too good at times, he observed. Ken has been a faithful member of the board of directors and the time spent and work done has been appreciated by the club.

A hearty applause was given Billy Masson and Johnny Durnigan, high scorers respectively in the playoffs.

It was regretted that manager Laurie Rasmussen, coach Lorne Lewis and several members of the Gas Kings were unable to be present at the banquet.

### TARIFFS AND AGRICULTURE

(By H. G. L. Strange)

For Agriculture to be prosperous our surpluses must be freely purchased abroad. To this end Canada must be prepared to lower her tariffs against British and foreign goods.

That this opinion is today shared by many thinking Canadians, and not least by the present Administration in Ottawa, is evident from the remarks of Hon. D. C. Abbott, Minister of Finance, who, in his budget speech of April 6th, said, in part, "This Government has steadily favoured reducing obstacles to trade and we must move in this direction if we expect others to do likewise."

Mr. Abbott went on to point out that, if the Government bowed to the demands for increased protection—now more numerous than at any time during the past few years—Canada would become a high cost economy and the country's economic problems would be aggravated. He believed that there was a growing impatience with the existing system of direct trade controls and discriminations and a general readiness to consider basic changes in trade policy in order to deal with exchange problems in a fundamental way.

There is much encouragement in Mr. Abbott's remarks and it is to be hoped that with the now favorable background of which he speaks, Canada will move quickly to modify her tariffs against British and foreign goods.

### Suggestions Wanted For Alberta Anniversary

Suggestions which will help Alberta celebrate her 50th birthday will be welcomed by the Fiftieth Anniversary Cabinet Committee of the Alberta Government.

In a special meeting following the dissolution of Legislature, the three-man committee decided to invite interested groups and communities to submit briefs, presentations, or ideas which will help Alberta to celebrate the 50th anniversary next year.

The cabinet committee is under the chairmanship of Hon. C. E. Gerhart, Minister of Municipal Affairs, while the two members are Hon. A. J. Hooke, Minister of Economic Affairs, and Hon. A. O. Aalberg, Minister of Education.

Suggestions should be sent to: Chairman, Fiftieth Anniversary Cabinet Committee, Natural Resources Building, Edmonton.

### JUNE RAINS TELL THE STORY

This is the open season for predictions as to what is likely to happen to grain crops in the ensuing five months. The time-liness and extent of rainfall in the month of June is the main factor in crop-production in that area. The records over the years would indicate that the wheat yields will approximate the number of inches of rainfall in June multiplied by five.

#### SEWING SECRETS

Here are a few tips to the home seamstress.

Fabrics of good quality, that are easy to care for.

To prevent stretching the material you are sewing, remember to start to sew at the widest opening and sew towards the smallest. For example, sew a side seam from the hemline to the waistline.

To construct a dart that will not pucker at the point, do not sew it to a point but make two or three stitches right along the crease line.

Press as you sew. Waist line and shoulder darts are pressed toward the centre of the garment.

Underarm and elbow darts are generally pressed downward.

On heavy fabrics darts may be slashed through centre and pressed open.

If you have a wool slip cover for your ironing board, and press mitt, it is easier to press a wool suit or dress without leaving glossy marks on the right side. Wool Jersey makes a good cover because it stretches and fits your mitt well.

Use two strands of elastic thread as a basis for thread covered belt-keepers or button loops. Cover these with thread to match the fabric using a button-hole stitch.

#### COOKING EGGS

Do you "hard cook" or "hard boil" eggs? Eggs should always be cooked over a low heat because a high temperature makes the egg white tough. Start the eggs in water heated to just below boiling and continue cooking at this heat. If you have a wood or coal stove set the eggs toward the back of the stove until they are cooked—time, 12 to 15 minutes.

#### A MULTITUDE OF GRADES

There is a great variation in the quality of grain delivered by the farmers of western Canada. This is indicated by the fact that in settling the 1952-53 wheat pool the Canadian Wheat Board is making final payments on 328 different grades of wheat. Only small lots were received of the great majority of these grades as 92 per cent of all deliveries graded 1 Northern, 2 Northern or 3 Northern. The predominant grade was 2 Northern which accounted for 51.4 per cent of total Board receipts.

### Seeding Near General Throughout Manitoba

WINNIPEG—Scores of tractors rumbled out across the Manitoba prairie Monday as spring seeding operations got underway.

H. E. Wood of the provincial agricultural department, said wheat seeding had started in the Altona and Winkler districts of Southern Manitoba "and planting will be pretty general in southern areas this week."

Wood added that farmers in the southwest corner of the province were worried because of the dryness of the soil but early and general rains would improve crop prospects.

### Diabetes

Diabetes has been known to medical science for thousands of years, but only since 1822 have doctors been able to treat it successfully. The tremendous advance was due to the discovery of insulin in Toronto by F. G. McClelland and C. H. Best.

The diabetic, who once was doomed to certain early death, today can live as long or longer — than the non-diabetic person.

Insulin, a hormone that is extracted from the glands of slaughtered animals, is vital to the utilization of sugar by the body.

In diabetes the patient's body cannot produce sufficient quantities of this hormone, with the result that the whole-body mechanism is thrown out of kilter. Injections of insulin correct this condition as long as they are continued.

Most cases of diabetes occur during later life—after the age of 40. One of the most serious complications of diabetes in elderly people is hardening of the arteries. This results in a reduced blood supply, especially to the legs and feet, and may pave the way for crippling infections. Recently an English doctor reported that terramycin was successful in treating 70 elderly diabetics suffering from various infections.

Of course, there are still advances that can be made and new preparations are worked on continuously. A new compound of insulin with zinc solution has recently been devised. This produces a high level of blood sugar during the day and a low level during the night and morning, timed to the needs of the patient.

## TREATING SEED

The time of the year has now arrived for farmers to think of treating their seed to avoid losses from smut and some other diseases. Formaldehyde, the old treatment, is out-of-date. Mercurochrome compounds are the order of the day. These compounds control certain diseases and some have an effect on wireworms. Some of them must not be used with oats, barley and flax. Farmers should make particular inquiries about these compounds.

## Local News

There will be an FUA meeting of the Ross Local in the Ross school at 8 p.m. on April 26.

Miss Vivian Stockton of Edmonton spent Easter week-end at the home of her parents Mr. and Mrs. E. Stockton.

St. Mary's W.A. is sponsoring a 3 act play called Chintz-Cottage in Kiefer's Hall. Mr. O. G. Griffiths, well known to Irma audiences, is directing and acting in this play. The proceeds will go towards the electric organ purchased for St. Thomas Church, Wainwright, and also to St. Mary's Church here. More about this play next week.

"B.C.N.U." at the Legion Hall on Saturday afternoon April 24 for a social time over a cup of tea and let's pick up some home baking for the week-end. It's a project of the W.A. We'll BCNU.

Miss Marjorie Lewis of Lloydminster visited her parents here at Easter.

Mr. and Mrs. I. H. Lewis and Marjorie motored to Hayter to see Ray Lewis who is in charge of the Searle Grain elevator there.

Mrs. McBurney enjoyed a visit from her parents, Mr. and Mrs. Bailey of Redpath, B.C.

Don't forget the visit of Miss Beulah Burns, Missionary from Korea who will speak in the Irma United Church on Sunday morning, April 25. Miss Burns has had very stirring experiences during the war years as she strove to care for the orphaned homeless children in Seoul.

Church services were wonderfully well attended in Irma at Easter. The redecoration of the Irma United Church made a lovely setting for the Easter services and is something we shall long derive benefit from but we even more rejoice that five of our young people joined our church fellowship on Good Friday morning.

Mr. and Mrs. H. Larson and girls spent the Easter week-end at Chauvin and Hughenden visiting relatives.

## Municipal District of Wainwright, No. 61

# Notice To Ratepayers and Lessees

On the advice and recommendation of the Wainwright Agricultural Service Board, Bylaw No. 61, and a Bylaw for the purpose of Prohibiting the Burning of Stubble reads in part:—

"Be it enacted that no person or persons shall willfully burn stubble on any lands within the Boundaries of the Municipal District of Wainwright No. 61, at any time unless a Fire Permit under the authority of the Forests Act being Chapter 43 of the Statutes of Alberta, 1948, and amendments, is issued."

Four reasons are put forward by the Board why the Bylaw was enacted.

1. Fertilizer value from stubble of a thirty bushel crop is equal to \$2.40 per acre.
2. Incorporation of stubble into Top Soil prevents wind and water erosion.
3. Fire can easily get out of hand from stubble to grass lands.
4. Loss of trees from natural bluffs from Fire running through them is great.

Fire permits will only be issued to farmers upon investigation by the personnel of the Service Board and only then after trial has shown that stubble cannot be handled with farm implements.

Your close co-operation will be greatly appreciated.

Secretary-Treasurer.

## RAINMAKING SCHEME

Some 2,500 farmers in the vicinity of Saskatoon have each subscribed \$5.00 a quarter section for a "cloud-seeding" scheme to increase rainfall on 2 million acres in that area. A Denver corporation has been engaged which is to increase rainfall by seeding clouds with vaporized silver iodide. Twelve generators will be set up at strategic locations which, when a storm cloud passes over, will send a billion crystals of this chemical into the air a minute. The moisture condenses around these particles and falls as rain.

Dr. Krick, head of the corporation, says that only about 10 per cent of the moisture in a storm cloud falls to the ground in the form of rain. It is the remaining 90 per cent of water vapor drifting by in the storm on which they work. He said that farmers in districts further on in the path of the storm would not be deprived of natural rainfall for, as the storm belt moved on, there would be a continual build-up of moisture in the clouds.—Wheat Pool Budget.

## Viking Items

A CNR freight train going east Monday afternoon had a "hot box", the result being a broken axle on one of the cars. The train crew toppled the car over and had to remove the wheels with the aid of the engine. The accident occurred 1 mile east of town. The track was cleared for traffic about 8:45 p.m.

Fire destroyed the farm home of Mr. and Mrs. D. Kalynchuk, four miles north and about 100 yards west of town on Monday afternoon.

An alarm was turned in at 5:25 p.m. and the Viking fire truck with fire chief Don Place and crew were on hand ten minutes later. They had the fire under control shortly after arriving, but the contents were destroyed.

The alarm was turned in by Mr. W. J. Kelly who resides immediately east of the Kalynchuk farm. The staff of the NWU fire camp arrived with hand fire extinguishers and assisted in confining the fire to the house before the fire truck arrived. Mr. Kalynchuk was at the Viking hospital visiting his wife who was a patient there.

The building was a small two storey structure, badly gutted by the fire, smoke and water damage, and considered a total loss.

Near the North Pole, Canada and Greenland are separated by only a few miles.
